- **10 Year commitment for habitat restoration**

Recreation Values

- **Hunting**
- **Wildlife viewing**
- **Hiking**

* Pheasants Forever is currently seeking funding to acquire the property, once acquired, they will donate the property to WDFW.

Revere Addition

Agency	Department of Fish and Wildlife
Estimated Acres	94
Existing Uses	Rangeland, half the property was farmed for 10 years. The site is a mixture of native and non-native grasses.
Threats	Development
Intended Uses	The management goal for this property is to restore to native grassland including forbs, and planted shrub rows. A 10-year habitat restoration plan has been completed and will be funded by Pheasants Forever.
Project Description	This property has been identified as valuable to upland game birds connecting the Bureau of Land Management (Escure Recreation Area) and WDFW lands (Revere Wildlife Area). Habitat is characterized as Palouse grassland and shrub steppe scabland with seeps and springs in the Rock Creek drainage. It supports mule deer, coyotes, badgers, raptors, upland game birds including pheasants and quail. Sharp-tail grouse habitat occurs on the nearby Revere Wildlife Area. The site provides critical winter range for mule deer. The restoration site will be monitored and used as an educational site. Pheasants Forever is currently seeking funding to acquire the property, once acquired by the organization the land will be donated to WDFW.
Partners/Supporters	Pheasants Forever, Spokane Bird Dog Assoc., Mule Deer Foundation and Inland Northwest Wildlife Council
